Dear Mom & Dad –

If you will please notice the man in the background holding a rifle you will observe that he is facing you and that he is only a matter of feet from the car.

If you were to see this man again you wouldn't know him from adam even though you can study this picture all day.

But yet a police officer said that he saw me 50 feet away, he didn't have his glasses on, he was looking at the passenger window of his car, and I glanced over my shoulder for only a second. (Besides this he has been shot in the head.)

Jack, this officer can't change his story because if he did he would be kick off the police force.

When the jury was out deciding the case I told this officer that he is mistaken and he laughed at me and said that I would never know what he saw.

Jack the FBI showed him three pictures of me the next day (no pictures of anyone else) and he said that I was the guy.

He remembers me from the day before when I was looking at the wrecked car as they were putting the dead man in an ambulance. That is the only time he ever saw me – HONEST!

What can I do? Please tell me that you haven't forgotten me.

Love – Charles
